## stick-on eye care

- 1** Lids By Design is a medical grade cosmetic strip that can be worn daily to lift up hooded eyelids - it gives instant visible results.

See [thefaceplace.co.nz](http://thefaceplace.co.nz) or look for Lids By Design's before and after videos on YouTube. One box contains 40 sets of strips, \$99.

- 2** Jennifer Aniston's well-regarded haircare company Living Proof has branched into skincare with Neotensil, an adhesive solution with a cross-linking polymeric film that makes undereye bags appear lifted. It's not yet available here (in the United States cost is around \$750 for a seven-week supply).

- 3** Try targeted skincare masks that treat the eye area - these are great for longer-haul travel. Try Shiseido Benefiance WrinkleResist Express Eye Smoothing mask, \$93 for 12, or Estee Lauder Stress Relief Eye Mask, \$72 for 10.
